## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 16-23, drawn to a cerium oxide/zirconium oxide composition.

Group 2, claim(s) 24-33, drawn to a process for making a cerium oxide/zirconium oxide composition.

Group 3, claim(s) 34, drawn to a catalytic system.

Group 4, claim(s) 35, drawn to a process for the treatment of exhaust gas.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical feature amongst all of the groups is the cerium oxide/zirconium oxide composition of claim 16. This common technical feature is not a special technical feature because it is found in the prior art. Vidmar et al., ("Effects of Trivalent Dopants on the redox properties of  $\text{Ce}_{0.6}\text{Zr}_{0.4}\text{O}_2$  Mixed Oxide," *Journal of Catalysis* 171, 160-168 (1997)), as cited in the ISR, teaches a cerium oxide/zirconium oxide composition with a molar ratio of cerium to zirconium of 1.5 having a surface area of  $89 \text{ m}^2/\text{g}$ . See Table 1 of Vidmar. Though the reducibility is not mentioned in Vidmar, the catalysts disclosed therein would have a reducibility in the range of that instantly claimed because the composition of the mixed oxide and the surface area of the catalysts in Vidmar are the same as those of the instant invention, thus the other properties must also be the same. Also, properties of identical chemical composition can not have mutually exclusive properties. See MPEP 2112.01. Therefore, the common technical feature is not a special technical feature, and thus the claims lack unity.

A telephone call was made on 8/6/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to

Art Unit: 1793

be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANTHONY J. ZIMMER whose telephone number is (571)270-3591. The examiner can normally be reached on Monday - Friday 7:30 AM - 5:00 PM EST.
